Professional Summary

Results-driven Software Engineering student at VIT with a robust foundation in full-stack web development, system architecture, and cloud deployment. Proven track record in designing scalable applications, optimizing workflow performance, and integrating modern technologies to solve complex technical challenges. Adept at cross-functional collaboration, technical documentation, and quality assurance across the full software development lifecycle (SDLC).

Education

- **Vellore Institute of Technology (VIT), Vellore** – *Integrated M.Tech in Software Engineering* | **CGPA:** 8.3 | **Expected Graduation:** 2028 | **Maharishi Vidya Mandir Sr. Sec. School** – **Higher Secondary (Class XII):** 84.2% (2022) | **Secondary School (Class X):** 72% (2020)

Technical Skills

Programming: Python, Java, C++, SQL, TypeScript, JavaScript, HTML | **DevOps & Tools:** Jenkins, Docker, Kubernetes, AWS, GitHub Actions, Postman, Jira, Git/SCM, MS-Excel | **Product & Project Mgmt:** Software Project Management (SPM), System Architecture, Technical Writing | **Web Development:** React.js, Next.js, Tailwind CSS, Node.js, RESTful APIs, Backend Development | **Testing & QA:** Manual &Functional Testing, Test Case Design,| **Databases:** PostgreSQL, MySQL,Oracle SQL

Academic & Technical Projects

Ponnangai Enterprises Billing System

- Engineered and deployed an inventory and billing management system for my company, Ponnangai Enterprises, on AWS, integrating a Next.js/React.js frontend with a high-performance Python/FastAPI backend. Conducted extensive manual functional and smoke testing, driving a 30% reduction in inventory discrepancies.

Ponnangai Website

- Developed and deployed the official corporate website for Ponnangai Enterprises (www.ponnangai.com), focusing on responsive UI/UX design and brand presence.

EffortLeap – Predictive Software Effort Estimation Tool

- Built a predictive effort estimation tool using TypeScript and statistical modeling to streamline software task duration analysis and user workflows.

Digital Fugitive – AI Search Paradigm Simulator

- Engineered a Python-based AI search simulator implementing stochastic search and knowledge-based agent logic via Manhattan distance heuristics.

Yap-To-Tale – GenAI Multimedia Narrative Pipeline

- Architected an event-driven GenAI pipeline using Python, Flask, and AWS (Bedrock, Polly, DynamoDB) to automate the creation of epic multimedia audio narratives.

Leadership & Experience

Intern | Muthusoftlabs (Summer 2026)

- Engineered and implemented a custom Point-of-Sale (POS) system following industry best practices, effectively streamlining business operations and enhancing operational efficiency.

Vice Chairperson | VIT Community Radio

- Lead executive operations and content strategy, coordinating student teams for campus-wide broadcasting.

Manager | Press & Media Committee, graVITas '26, VIT

Coordinator | Documentation Committee, Riviera '26

Coordinator | Outreach & Broadcasting, graVITas '25, VIT

Accomplishments

- **InnovAct-2025 Hackathon:** Participated in the hackathon organized by the Institution's Innovation Council (IIC) at VIT, contributing to innovative technical solutions for World Entrepreneurship Day.
- **Tata Data Visualisation Simulation:** Completed a job simulation focused on empowering business through effective data insights.
- **Nestlé Nesternship:** Successfully completed the internship game and earned a certificate of participation.
